COMPANY OVERVIEW

Model: **B2B, B2B2C**

Founded: **2010**

Location: **Israel**

Industries Verticals: **Healthcare-Digital Health**

Potential Market Size: **\$2B by 2025**

Funds raised: **12.5M USD**

Company stage: **Growth**

Clinical stage: **FDA/CE approved**

PROPOSITION

The ultrasound market is rapidly growing, with ultrasound being the only imaging modality (vs. MR/CT/X-Ray) that continues to expand into new clinical settings including ER, ICU, internal medicine, EMS, special forces unit and GPs. Additional key market drivers include ultrasound devices' portability, decreasing prices and growing improvements of image quality. Yet, capturing and evaluating ultrasound images is still mostly done visually. Such a process is error prone, time consuming and dependent on the user's experience. Our FDA/CE approved solutions automate this process, therefore making the use and analysis of ultrasound images smarter and accessible to all.

TEAM

Hila Goldman-Aslan CEO

Years of experience leading Health-Tech companies from idea through proof of concept, product development to commercialization

Michal Yaacobi CTO

Experienced R&D Manager with more than 20 years working in the computer software industry, specializing in medical computer vision

HIGHLIGHTS

7 FDA and CE approved solutions

8 Channel Partners including GE Healthcare, IBM Watson Health, and Konica Minolta

Serving thousands of end-users in more than 20 countries
